PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1.5+ years of hands-on experience building high-performance,scalable web applications and AI-powered products. Deep expertise in the MERN stack, Next.js, and modern frontend frameworks including Vite and PHP-based backends. Proven track record of delivering production-ready eCommerce platforms, CMS solutions, admin dashboards, and live AI products including RAG chatbots, intelligent agents, and automation workflows. Passionate about synchronizing AI capabilities with web development to create next-generation digital experiences. Adept at leading cross-functional teams, optimizing application performance, and driving end-to-end product delivery from architecture to deployment.

CORE COMPETENCIES

Frontend: Next.js, React, Vite, TypeScript, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend: Node.js, Express.js, PHP, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Supabase, Firebase

AI & ML: Python, OpenAI SDK, LangChain, LangGraph, RAG Chatbots, AI Agents

DevOps & Tools: Git, GitHub, Docker, Vercel, Figma, VS Code, CI/CD

Specialties: AI Product Development, CMS Integration, eCommerce, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer & AI Solutions Engineer

S-Tech Innovative | Karachi, Pakistan | April 2025 – Present

- Lead full-stack development of production web applications, managing end-to-end delivery from architecture design through live deployment on Vercel and cloud platforms.
- Architect and maintain functional databases powering 5+ web applications, with integrated payment gateways and robust backend servers ensuring 99.9% uptime.
- Develop and deploy AI-powered features including RAG chatbots and intelligent automation agents, enhancing user engagement and reducing manual workflows by 40%.
- Conduct rigorous code reviews, resolve complex bugs, and integrate third-party APIs, achieving a 30% improvement in data retrieval speed and overall UX performance.
- Implement CMS platforms with modern content workflows, enabling non-technical teams to manage dynamic web content independently.

Web Developer

Byte-Forge Solutions | Europe (Remote) | January 2025 – March 2025

- Built a full-stack interactive web application ("Code & Stories") for children using Next.js, React, and Supabase, collaborating with cross-functional international teams.
- Boosted overall website performance by 25% through front-end and back-end optimizations, lazy loading, and CMS integration for seamless content updates.

- Designed and implemented secure, well-documented RESTful APIs for third-party integrations without compromising application performance or security.

Freelance Full Stack Developer

Self-Employed | Remote | October 2023 – December 2024

- Delivered 10+ client projects including eCommerce stores, landing pages, and admin dashboards using Next.js, React, Tailwind CSS, and Node.js.
- Built and deployed AI-powered products integrating OpenAI APIs, LangChain, and RAG pipelines for intelligent search and automated customer support.
- Developed responsive, mobile-first web interfaces with a focus on accessibility, SEO best practices, and cross-browser compatibility.

KEY PROJECTS

Admin Management System (Mary Pee Official) — TypeScript, Next.js, React, Tailwind CSS

- Production-grade admin dashboard with role-based access control, real-time analytics, and dynamic content management capabilities.

Ecommerce Hackathon Platform — TypeScript, Next.js, Sanity CMS, Stripe API

- Full-featured eCommerce store with product catalog, cart management, checkout flow, payment integration, and headless CMS for dynamic product updates.

AI Agents & Automation Suite — Python, OpenAI SDK, LangGraph, LangChain

- Collection of intelligent AI agents for workflow automation, data pipeline processing, and conversational AI assistants deployed in production environments.

RAG Chatbot for Web Applications — Python, LangChain, OpenAI, Vector DB

- Retrieval-Augmented Generation chatbot integrated into web apps, enabling context-aware conversations with domain-specific knowledge bases for enhanced user support.

Kids Code & Stories Platform — Next.js, React, Supabase

- Interactive children's educational web app with gamified coding lessons, story-based learning modules, and a responsive, accessible UI designed for young learners.

Library Manager CLI — Python

- Command-line library management system with clean architecture, CRUD operations, search functionality, and structured data persistence.

EDUCATION

Bachelor of Science in Computer Science

KFUEIT, Rahim Yar Khan | Graduated April 2025

Higher Secondary School Certificate (Intermediate)

APSACS, Rahim Yar Khan | Completed April 2021
